AGRICULTURAL.

From the South Carolinian. REPORT ON MANURE.

Read before the society at its annual meeting,

July 25. The best manner of preparing and increas-ing the value of Manures, is of the highest lid and soluble parts of manures have a tenimportance to every one engaged in agricultural pursuits. By a long continued succession of crops the soil becomes exhausted, and unless supplied with those materials necessary for the nourishment of vegetation, ceases to produce. This is forcibly impressed upon the minds of the members of this society from the fact that they have frequently seen fields which were originally fertile, cultivated without the aid of manure, completely exhausted and thrown out, as not worth the expense and trouble of enclosing. The spirit of improvement is, however, at work, and they now find that it would have been much easier to have prevented sterility than to restore the soil to its original productiveness. In some soils to which nature has been unusually bountiful in imparting the means of fertility, the deterioration has been slow, and in some few instances almost imperceptible, still exhaustion has been gradually going on even there, and they are convinced at last that they cannot continue to take off crop after crop without returning something to the soil to feed

The lighter and more ordinary soils require more immediate attention, and the profits of planting depend, in a great measure, upon the faithful application of all the manure which can possibly be procured upon the farm.

Manure is the organic remains of what has constituted vegetable life. Its application in this State to the germinating seeds and quicking duties in collecting all other material that will contribute to its increase. For this purpose he should keep his stables supplied with a regular and abundant supply of litter, which should be regularly cleansed out and deposited in a suitable place prepared for the purpose. The cattle should be furnished with a bountiful supply of leaves, pine straw, or other litter, and they should be regularly penned upon this material every night during the year; for to farm yard manure must the farmer or planter principally look for the improvement and fertility of his soil, mixed with straw and the refuse material upon which they feed, with the droppings of the cattle. This material, by being constantly trampled under foot, and kept moist by the reception of the drainage of the yard, will be finally converted into valuable manure. During the winter months they should be provided with suitable shelters, under which proper fixtures should be put up to

supply them with food; and it will be found more profitable to keep them up and feed them regularly than to suffer them to wander the fields in search of the scanty supply of arid herbage. The litter, after being trodden up, should be taken up at regular intervals and deposited in a pit, (when the yard is unfavorably situated for the purpose,) and drains made to carry everything to this point. It should all be deposited in a mass, that the proper fermentation may take place previous to its use. In this heap all the ashes collected on the place may be incorporated with great advantage. Where a pile of manure is made in this way, the fermentation takes place in the quantities applied as they are successively deposited, and therefore does not usually reach that point where material loss is sus-

tained by evaporation. If it is found that the heat is becoming too great, or the fermentation injuriously rapid, so as to cause the escape of amonia, a layer of earth, peat, or sods will retain, by combination, the escaping gases, and thus prevent loss. It has been found a most excellent plan-one which not only greatly increases the quantity of manures made in this way, but adds to its quality-to mingle with or cover the successive deposites with earth from ditches or pounds as a fixer of ammonia, is charcoal-a material mer by millet and other green crops.

W. JOHN YOPP. Oct 5, 1849-[4-3t

centrated all the Medicinal properties of Sarsaparilla, combined with the most effectual simples of the vegetable kingdom; and it has been so fully tested, not only by patients themselves, but also by Physicians, that it has received their unqualified recommendations and the approbation of the public; and has established on its own merits a reputation for VALUE and Efficacy far superior to the various compounds bearing the name of arsaparilla. Diseases have been cured, such as are not furnished in the records of time past: and what it has already done for the thousands who have used it, it is capable of doing for the millions still suffering and struggling with disease. It purifies, cleanses, and strengthens the fountain springs of life, and infuses new vigor throughout the whole animal frame.

The diseases for which this article is recommended are those to which it is known from personal experience to be adapted; and those apparently removed beyond the sphere of its action have yielded to its influence. The catalogue of complaints might be greatly extended to which the Sarsaparilla is adapted, but experience proves its value, and each succeeding day is adding new trophies to its fame.

REMARKABLE CURE OF BRONCHITIS.

Messrs, Sanns:-Having suffered many years with a disease of my throat, affecting he larynx, during which time I was treated by the most distinguished physicians Europe and the United States, without receiving any permanent benefit, but all the time my general health and strength declining, and the di-case making fearful progress: caustic applications were used, and whatever else was thought most efficient for producing a cure; but I am confident the deplorable situation I was in, the larynfor producing a cure; but I am connect the deplorable situation I was in the laryn-gitis being accompanied with phthisis and great difficulty in breathing, would soon have terminated my life, had I not obtained relief through the medium of your valu-able Sarsaparilla. I must say, gentlemen, when I commenced using the Sarsaparilla I did not place much confidence in its virtues; and this will not surprise you, when ou are informed I had tried more than fifty different remedies during the past four rears, without any success; but after taking your Sarsaparilla a few weeks, I was obliged at last to yield to evidence. This marvellous specific has not only relieved, but cured me: and I therefore think it my duty, gentlemen, for the benefit of suffering humanity, to give you this attestation of my cure. Yours very truly,

Consulate of France in the United States. The above statement and signature were acknowledged in our presence by Mr. D. Parent as true.

For the Consul-general of France,

L. BORG, Vice-Consul. CANCEROUS ULCER PERMANENTLY CURED.

LET THE FACTS SPEAK FOR THEMSELVES .- The following striking, and, as will be seen, permanent cure of an inveterate Cancer, is only another link in the great chain of testimony to its merits. Let the afflicted read and be convinced. What it has

Messrs. A. B. & D. Sands :- Gentlemen-In the year 1842 I was attacked with a cancer in my neck, which soon extended its ravages over the side of my face, eating the flesh, and leaving the cords of my neck bare, discharging very freely, causing intense pain and suffering, depriving me of rest at night an l coinfort by day, destroying my appetite, and reducing me almost to the gates of death. I was attended by the physicians in the state, who prescribed for me, and did all that skill and talent deflect, but during all the time I continued to grow worse under their care. In the Spring of 1844 I chanced to hear of the cures performed by your Sarsaparilia, and determined to try it. I had not used over two bottles before I felt its effects on my system most sensibly. My appetite was soon restored, my strength was increasing, the discharge from the cancer decreased, and I soon began to perceive that the flesh was healing. I continued its use according to directions, and also continued to grow better and better from day to day, until I have been fully and wholly cured by its use. It is now two years since I was cured, and I have remained perfectly well up to this day. I have delayed giving you this certificate, that I might ascertain whether the disease would reappear; but I am happy and most thankful to again repeat that the cure is a perfect one, and effected wholly by the use of your Sarsaparilla. The scars still remain; and all who know me, and many of the citizens of Stamford, can testify to the severity of my case and my sufferings, and the health-restoring power of your Sarsaparilla. I can with unhesitating confidence recommend its use to every sufferer afflicted with similar complaints. After experiencing what I have from its effects, I can say to one and all, "Hesitate and doubt no longer, but secure to yourselves the health-giving virtue this medicine can alone bestow." Most gratefully I am, and shall always remain, your friend, ISAAC STEVENS.

TESTIMONY FROM EUROPE. Messrs. A. B. & D. Sands:—Gentlemen—Having seen your Sarsaparilla used in this city with great effect in a severe case of Scropula, I have been requested to order three dozen bottles, which please send, on the payment of the enclosed draft on Messrs. Henschen & Unkhart, with the least possible delay. I am inspired only by a feeling of philanthropy, in begging you to publish this unasked testimony to the value of a medicine which, widely as it is known, is not known as it ought to be.

I am, Gentlemen, respectfully yours, &c. THEODORE S. FAY.

HOWARD & PEDEN.

CAULION EXTRA A man by the name of CLAPP has engaged with a young man of the name of S. P. Townsend, and uses his name to put up a Sarsaparilla, which they call Dr. Townsend's Sarsaparilla, denominating it GENUINE, Original, etc. This Townsend is no doctor, and never was; but was formerly a worker on railroads, canals, and the like. Yetho assumes the title of Dr., for the purpose of gaining credit for what he is not. This is to caution the public not to be deceived, and purchase none but the GENUINE ORIGI is the Old Dr's. likeness, his family coat of arms, and his

signature across the coat of arms. Principal Office, 102 Nassau-st., New York City.

THE ORIGINAL DISCOVERER OF THE

Genuine Townsend Sarsaparilla.

Knowing, many years ago, that he had, by his skill science and experience, devised an article which would be of incalculable advantage to mankind when the means would be furnished to bring it into universal notice, when its inestimable virtues would be known and apper when this time has come, the means are supplied; this GRAND AND UNEQUALLED PREPARATION is manufactured on the largest scale, and is called for throughout the length and breadth of the land, especially as it is found incapable of degeneration or deterioration. Unlike young S. P. Townsend's, it improves with age, and never changes, but for the better: because it is prepared en scientific principles by a scientific man. The highest knowlfermentation and acid, which is injurious to the system. Some of the properties of Sarsaparilla are so relatile, that they entirely Caporate and are lost in the preparation, if they are not preserved by a scientific process, known only

Any person can boil or stew the root till they get a dark solored liquid, which is more from the coloring matter in the root than from any thing else; they can then strain this insipid or vapid figuit, sweeten with sour molasses and then call it "SARSAPARILLA EXTRACT or SY. RUP." But such is not the article known as the GENUINE OLD DR. JACOB TOWNSEND'S SARSAPARILLA.

This is so prepared, that all the inert properties of the Sarsaparilla root are first removed, every thing capable of becoming acid or of fermentation, is extracted and rejected; then every particle of medical virtue is secured in a pure and concentrated form; and thus it is rendered incapable of losing any of its valuable and healing properties. Prepared in this way, it is made the most powerful agent in the Cure of innumerable diseases. Hence the reason why we hear commendations on every aide in its favor by men, women, and children. We find it

doing wonders in the cure of CONSUMPTION, DYSPEPSIA, and LIVER COM-PLAINT, and in RHEUMATISM, SCROFUL. PILES, COSTIVENESS, all CUTANEOUS ERUP. VALUABLE RESIDENCE AND PLANTATION TIONS, PIMPLES, BLOCTHES, and all affections IMPURITY OF THE BLOOD. It possesses a marvellous efficacy in all complaints arising from Indigestion, from Acidity of the Stomack, from unequal circulation, determination of blood to the head, palpitation of the heart, cold feet and hands, cold chills and hot flashes over the body. It has not its equal in Colds and Coughs; and promotes easy expectoration and gentle perspiration, relaxing stricture of the lungs, throat, and every other part

But in nothing is its excellence more manifestly seen and acknowledged than in all kinds and stages of FEMALE COMPLAINTS. It works wonders in cases of Fluor Albus or Whites, Falling of the Womb, Obstructed, Suppressed, or Painful Menses, Irregularity of the menstrual periods, and the like; and is as effectual in curing all the forms of Kidney Diseases. By removing obstructions, and regulating the genera

system, it gives tone and strength to the whole body, and thus cures all forms of Nervous diseases and debility. and thus prevents or relieves a great variety of other mala dies, as Spinal irritation, Neuralgia, St. Vitus' Dance Seconing, Epileptic Fits, Convulsions, &c.
It cleanses the blood, excites the liver to healthy action, tones the stomach, and gives good digestion, relieves the bowels of torpor and constipation, allays inflammation, purifies the skin, equalises the circulation of the blood. producing gentle warmth equally all over the body, and

the insensible perspiration; relaxes all strictures and tight-ness, removes all obstructions, and invigorates the entire nervous system. Is not this then ALSO, a tract of 25 acres, near the Mineral The medicine you pre-eminently need? But can any of these things be said of S. P. Townsend's inferior article? This young man's liquid is not to be COMPARED WITH THE OLD DR'S, because of one GRAND FACT, that the one is INCAPA

NEVER SPOILS, good bonds, and paid at the end of one, two, and while the other DOES; souring, fermenting, and blewing the bottles containing it into fragments; the sour, acid liquid exploding, and damaging other goods! Must not this horri ble compound be poisonous to the system !- What! put acid into a system already diseased with acid! What causes AT the same time and place with the above will also be sold, on a credit of six months, all the personal property, except the slaves, belonging to the estate, consisting of the crop, horses, a mule, cattle, hogs, a carriage, a buggy, a sulky, a libra-Skin, Scald Head, Salt Rheum, Erysipelas, White Swell ings, Fever Sores, and all ulcerations internal and external It is nothing under heaven, but an acid substance, which sours, and thus spoils all the fluids of the body, more or less. What causes Rheumatism but a sour or acid fluid which insinuates itself between the joints and elsewhere. irritating and inflaming the delicate tissues upon which it acts? So of nervous diseases, of impurity of the blood, or deranged circulations, and nearly all the allments which afflict human nature.

Now is it not horribic to make and sell, and infinitely worse to use this SOURING, FERMENTING, ACID "COM-POUND" OF S. P. TOWNSEND, and yet he would fain have it understood that Old Dr. Jacob Fownsend's Genuine Original Sarsaparilla, is an IMITA-FION of his inferior preparation!! Heaven forbid that we should deal in an article which would bear the most distint resemblance to S. P. Town-send's article! and which should bring down upon the Old

Or, such a mountain load of complaints and criminations from Agents who have sold, and purchasers who have used S. P. Townsend's FERMENTING COMPOUND We wish it understood, because it is the absolute truth, that S. P. Townsend's article and Old Dr. Jacob Townsend's Sarsaparilla are heaven-wide apart, and infinitely dissimilar; that they are unlike in every particular, having not one single thing in common.

As S. P. Townsend is no doctor, and never was, is no chemist, no pharmaceutist-knows no more of medicine of disease than any other common, unscientific, unprofessional man, what guarantee can the public have that they are re-ceiving a genuine scientific medicine, containing all the virtues of the articles used in preparing it, and which are to capable of changes which might render them the AGENTS of Disease instead of health.

But what else should be expected from one who knows nothing comparatively of medicine or disease! It requires a person of some experience to cook and serve up even a common decent meal. How much more important is if 1/21 the persons who manufacture medicine, sesigned for WEAK STOMACHS AND ENFEEBLED SYSTEMS, should know well the medical properties of plants, the best manner of securing and corcentrating their healing virtues, also an extensive knowledge of the various diseases which affect the human system, and how to adapt remedies It is to arrest frauds upon the unfortunate, to pour bake into wounded humanity, to kindle hope in the bosom, to restore health and bloom, and vigor into the crushed and broken, and to banish infirmity that OLD DR. JACOB TOWNSEND has SOUGHT and FOUND the op-

Grand Universal Concentrated Remedy within ine reach, and to the knowledge of all who 200d it, that they may learn and know, by joyful experience, its Transcendent Power to Heal. DR. Jacon Townsand: New York. Oct. 5, 1848. Sir: -On the 20th of July, 1847, I was again attacked

Six:—Or the 20th of July, 1847, I was again attacked with rheumatism, and continued, under various prescriptions, to grow worse for at least two months. I became entirely helpiess, incapable of feeding myself, or turning in bed, or helping myself any way. In this state I remained antil January, 1848, when I began to mend a little and interve gradually till the 1st May. This amendment was only so far as to be able to feed myself, though still incapable of getting in or out of bed, or even turning in bed. I remained in this condition, with little or no change, until fairly despaired of getting about again this season. On the 21st July, I was induced to try your Sarsaparilla; on the THE first session of this institution will open

The first day of October under the first day WALKED ACROSS THE ROOM

east of Wilmington, on the road leading to Newbern, healthfully and pleasantly situated, in a neighborhood where board may be obtained at \$6 per month. Terms of tuition will be as follows, viz:—
